**Group Assignment (3/4 members per group)**

INSTRUCTIONS:

Students are required to build a Web Site for Institution of Education.

1. Develop a website with a GPA and CGPA calculator. Use your group's name as the Institute's name. You can refer to any education website. Your website must have a minimum of 5 web pages. Below are several examples of GPA and CGPA calculator.

2. Your web application should cater to a user with a color-blind problem. You can refer to this: https://www.colourblindawareness.org/colour-blindness/

3. The web application must have customization in colors, application name in the title bar, and unique icons. Follow the 8 golden rules when you design your web application.
4. The web application must include the about page which lists developers' details, information, and copyright statement, and include a clickable URL of the application website.
5. You need to present and show the demonstration of your web application. Provide justification for your interface (layout, navigation, and so on). Submit your video presentation and web application files through Teams. Due date: Week 14

EVALUATION:

The students are required to demonstrate the application in a video emphasizing the elements listed in the rubrics. Your mark will be based on the web application and the video presentation.
